

AMORIM

Amorim & Irmãos, S.A.

Environmental Policy

Amorim & Irmãos places its full commitment, at all the organizational levels, in the development of its activity of manufacturing and distribution of natural cork stoppers with the utmost respect for the Environment.

In order to achieve this objective, while keeping the company's competitiveness and the well-being of its employees and local community, A&I commits itself to:

- Guarantee, at each moment, the fulfilment of applicable environmental legislation;
- Deepen, constantly, the knowledge about the environment, real and potential impacts, through the control of significant environmental aspects in order to ensure an appropriate pollution prevention;
- Develop its business processes and behaviours in order to improve, continuously, its environmental performance, in what concerns the respect for production and waste management, the particles-release control, the noise levels in the exterior and the prevention and reaction in case of fire.

To guarantee the fulfilment of these commitments, Amorim & Irmãos:

- Maintains actively and appropriately an Environmental Management System, implemented with ISO 14001 norm as a basis;
- Selects the technologies, adopts good environmental practices, provides awareness and training to its employees and establishes, periodically, the goals and improvement marks, in order to guarantee that it operates in conditions that allow the company to control, within the demands of its own policy, the environmental impacts resulting from its activity.

As a responsible company and showing its commitment to the market, Amorim & Irmãos is aware that today's development cannot compromise the development of future generations. During 2007, Amorim will implement a sustainability program, becoming therefore the first natural cork company in the world to develop an actual sustainability management programme, which will be included in its next Annual Report.
